

RELAX. YOUR POOL WILL CLEAN ITSELF.

ALWAYS A CLEAN POOL

When it comes to spending your free time there are more important things to do than tending to your swimming pool. Thanks to PCC 2000, the automatic in-floor pool cleaning system, your pool is engineered to clean your entire pool, including floors, steps, benches, even spas. When not operating, PCC 2000 disappears back into the pool floor, making it virtually invisible. There are no vacuum hoses left floating in the pool. All that's left is a sparkling clean pool that's ready to enjoy.

*Minimal maintenance is required.

HOW IT WORKS!

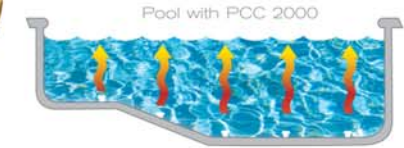

1. Pop-up nozzles push debris from every corner of your pool toward the Patented Collection Zone.
2. Debris is then directed to the MDX active main drain.
3. The powerful MDX Debris Removal System™, with anti-entrapment technology, removes the debris.
4. An optional in-deck debris canister collects the debris for convenient disposal.
5. This process guarantees improved water circulation for optimal clarity and pool efficiency.

THE TECHNOLOGY BEHIND RELAXATION.

PCC 2000 uses rotating cleaning nozzles placed strategically in your pool floor, steps and benches. These nozzles work together to systematically sweep debris out of your pool through the MDX safety main drain and into your poolside leaf canister.

IMPROVED CIRCULATION SAVES CHEMICALS, ENERGY AND MONEY.

Pool is heated from the bottom.

Paramount Pool & Spa Systems' MDX Debris Removal System effectively eliminates debris that is delivered to the drain and offers several layers of anti-entrapment protection for you and your loved ones.
